RE: INSTALLATION OF WELLS

Dear Mr. Larson:

We request permission to install three shallow wells on Timuquana Country Club property in order to measure water elevations. The wells would be installed next spring as part of a study of groundwater flow at our wastewater treatment plant. These wells could also be used for water reuse information. We would like to meet with you to discuss this request.

We assure you that the wells would be constructed flush with the ground in unobtrusive locations. We would fence a temporary storage area near the station boundary access gate for barrels of construction soil and water awaiting test results prior to disposal.

Mr. Kevin Gartland of my Environmental Division will call to schedule the meeting. We appreciate your assistance.

Sincerely,

G. E. MONROE
CAPT, CEC, USN
By direction of the Commanding Officer.
